7. UNDERGRADUATE TEACHING EXPERIENCE (1999-2010)

I was for two years Director of Studies in philosophy at St Edmund's College, Cambridge. I was responsible for organising supervisions for their philosophy students, and I also took part in the admissions procedure. In addition, did supervisions with students in several other colleges in Cambridge (Queen's, St Catherine's, Emanuel, Homerton, Clare, etc.).

While working at Lulea University of Technology I developed a number of skills that have proved very useful in many professional situations. I taught and developed a large number of philosophy courses for engineering students, as well as for philosophy students. I realised that it is important to adjust the material presented in a course (as well as the style the material is presented in) according to the expectations of the students.
